

I MIDQUESTION PAPER – SET 1

Year / Sem: IIB.Tech, IISem	Programme:B.Tech	Subject Code:23PCCS404
Course Name: Operating Sysem	Total Marks: 30	Time: 90 Min

CO: Course Outcome
1-6)

Level: Bloom' s Taxonomy (Level

Answer all questions

Q. No.	Level	CO. No	Questions														
1	a)	CO1	a) Define operating system? Explain about batch processing and timesharing operating system.(10M)														
	b)	CO1	(OR) b) What are the services provided by the operating system? Explain briefly. (10M)														
2	a)	CO1	a)Explain about important functions in operating system (10 M)														
	b)	CO2	(OR) b) Explain different process states with a neat diagram and process control block(PCB).(10M)														
3	a)	CO2	a)Discuss the different types of Multithreading models in operating system(10M)														
	b)	CO2	(OR) b) Suppose that the following processes arrive for execution at the times indicated. Each process will run for the amount of time listed. In answering the questions, use non preemptive scheduling, and base all decisions on the information you have at the time the decision must be made. <table><tr><td>Process</td><td>Arrival Time</td><td>Burst Time</td></tr><tr><td>P1</td><td>0</td><td>7</td></tr><tr><td>P2</td><td>2</td><td>4</td></tr><tr><td>P3</td><td>4</td><td>1</td></tr><tr><td>P4</td><td>5</td><td>4</td></tr></table> What is the average turnaround time for these processes with the SJF scheduling algorithm? (10M)	Process	Arrival Time	Burst Time	P1	0	7	P2	2	4	P3	4	1	P4	5
Process	Arrival Time	Burst Time															
P1	0	7															
P2	2	4															
P3	4	1															
P4	5	4															

C01: Describe various generations of operating system and function of operating system.

C02: Describe the concept of program process and thread and analyze various CPU scheduling algorithms and compare the performance.

C03: solve inter process communication problems using mathematical equations by various methods.

I MID QUESTION PAPER – SET 2

Year / Sem: IIB.Tech, II Sem	Programme:B.Tech	Subject Code:23PCCS404
Course Name: Operating System	Total Marks: 30	Time: 90 Min

CO: Course Outcome
1-6)

Level: Bloom' s Taxonomy (Level

Answer all questions

Q. No.	Level	CO. No	Questions
1	a) 2	C01	a) Discuss with help of a neat diagram the structure of Operating System. (10M)
	b) 2	C01	(OR) b) Discuss various operations of Operating System. (10M)
2	a) 1	C01	a) Explain briefly about system calls with suitable examples. 10M)
	b) 2	C02	(OR) b) Discuss about process scheduling based on queues with diagram (10M)

3	a) 2	C02	A) Define process? Discuss about various operation on processes. 10 M)
	b) 1	C02	(OR) b) Explain about Inter Process communication, in client – server systems. (10M)

C01: Describe various generations of operating system and function of operating system.

C02: Describe the concept of program process and thread and analyze various CPU scheduling algorithms and compare the performance.

C03: solve inter process communication problems using mathematical equations by various methods.
